***Drawings***

1. The drawings filed on 10/06/2006 are acceptable by the examiner.

***Allowable Subject Matter***

2. Claims 1-19 are allowed.
3. The following is an examiner's statement of reasons for allowance: In Kwag et al the clamp (16) is not a ring (see Figs 2A). Halpin et al (US 6,113,702) discloses (Figs 6-8) a substrate holder assembly comprising a circumscribing annular ring (82). However, in Halpin et al the ring does not have a portion extending inward over the fluid diffusion member (80) or an arm extending inwardly over the upper surface of the fluid diffusion member. Halpin et al also does not disclose a fluid-dispensing member positioned above the fluid diffusion member or a fluid dispensing nozzle positioned to dispense a solution onto upper surface of the substrate. Prior art of record does not disclose or suggest, a fluid processing cell comprising, among others, a substrate support having a an annular substrate support ring circumscribing the fluid diffusion member and having a portion extending inward over the fluid diffusion member, or an annular substrate support ring having at least one substrate arm extending over the upper surface of the fluid diffusion member.
